### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. This application is in condition for allowance except for the presence of claims 14-16 to an invention non-elected without traverse. Accordingly, claims 14-16 have been cancelled.

### **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest methods of bonding silicon carbide bodies to siliconized silicon carbide bodies as claimed. Prior art teachings show that the siliconization of silicon carbide is old and well known (Chia, Weaver). It is also called reaction bonding, reaction sintering or self sintering. It has been known to make resistance elements, resistors or heating elements out of siliconized silicon carbide and to only siliconize the portions of the element that require good electrical conductivity (Heyroth and Watson). It has also been known to make silicon carbide resistors by firing in an induction furnace (Thompson). However, the prior art has not taught the use of induction heating to cause silicon metal to flow from the siliconized silicon carbide structure to form a siliconized silicon carbide bond between the siliconized silicon carbide structure and the silicon carbide structure. It would not have been obvious to utilize a flow of

molten silicon from a siliconized silicon carbide body as the bonding agent between said body and another silicon carbide body.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean E. Vincent whose telephone number is (571) 272-1194. The examiner can normally be reached on M - F (8:30 - 6:00).

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P. Griffin can be reached on (571) 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
